A. Introduction

This appendix provides a County Economic Profile, Vulnerability Profile and a more detailed vulnerability analysis of critical facilities and corresponding maps.

B. County Profile

This section of the report, and the data contained herein, is provided to capture a profile of the county including geographic and economic characteristics not previously discussed in Chapter I. In addition, many of the critical infrastructure partners including private sector and public utilities are identified.

COUNTY PROFILE

C. Critical Facility Vulnerability Analysis

Considerable staff resources were expended to update the critical facilities inventory. Specific attention was paid to health care facilities such as hospitals and nursing homes; emergency response agencies, hazardous materials, mobile home parks, schools and colleges and community centers. Where possible, communications resources and community infrastructure /utilities such as water and waste-water facilities were located by latitude and longitude and overlaid on the storm tide limits map. Each facility has the facility type, name, location, elevation, flood plain, fire and results of the 2010 surge analysis based on the most accurate topographic data and the SLOSH model.

The Critical Facilities Inventory (Data base) includes a comprehensive list of critical facilities identified by the State and County Emergency Management Agencies. This inventory is not published as part of the report. However, selected facilities which may require evacuation or mitigation are identified in the tables and maps which follow. The tables indicate vulnerability from storm surge (based on the SLOSH model), freshwater flooding (based on the FEMA Flood Maps) and wildfire (Wildfire Interface/Levels of Concern).

The illustration below identifies the potential storm surge heights on county landmarks. This illustration is provided for public information purposes only.

The maps following tables IVD-1 and IVD-2 are illustrated at an elevation of 20', which is used to indicate a worst case scenario.

Table IVD-1: Hendry County Health Care Vulnerability Assessment
